Profile

Aspiring Back-End Developer with strong expertise in building scalable and high-performance web applications using **Node.js** and **Express.js**. Passionate about **Machine Learning** and **Artificial Intelligence**, with hands-on experience exploring modern AI tools such as **LangChain** and **vector databases** to build intelligent, real-world applications.

Technical Skills

Language : Python , Javascript

Backend: Django, Django Rest Framework, Express.js, Node.js

Database: MongoDB, MySQL, Chroma

Tools: Git, GitHub, VsCode, Cloudinary, Postman, JWT , Djoser, Docker

Machine Learning & AI: Numpy, Pandas, matplotlib, Scikit-learn, Tensorflow, Langchain, Hugging Face

Projects

Movie Recommendation System [GitHub](#) [Preview](#)

- Built an interactive Movie Recommendation System using Streamlit.
- Allows users to select a movie from a dropdown and get top 5 similar movie recommendations.
- Displays movie posters dynamically fetched from the TMDB API.
- Made API calls with Requests to fetch movie data and images.

CookBot [GitHub](#) [Preview](#)

- Developed an interactive web app that generates complete recipes based on user-provided ingredients using LangChain and Hugging Face LLMs.
- Integrated a chat-based interface for user input and recipe generation.
- The structured recipe output includes the recipe title, ingredients with quantities, step-by-step cooking instructions, and optional tips and variations.
- Powered by Llama 3.1 8B Instruct for recipe generation.
- Adapts recipes to regional preferences (e.g., Nepali, vegetarian, quick meals).

E-Commerce [GitHub](#)

- Structured into models, controllers, services, middleware, and validators for better scalability and maintainability.
- Supports core e-commerce features like user management, product management, and order handling.
- JWT-based authentication for secure, stateless user sessions.
- JOI validation used to validate incoming request data and ensure data integrity.
- Role-based access control (RBAC) to restrict admin and user functionalities.

EDUCATION

Pashchimanchal Campus (WRC)

04/2021 - Present

Bachelor's Degree in Computer Engineering

Sagamatha Higher Secondary School

2019 - 2021

Higher Secondary Education (3.36 GPA)
